THE EXECUTIVE MAYOR'S MONTHLY BRIEF

Dear Residents,

It is with excitement that I present the trial edition of The Resident, the municipality's external source of news and information. This newsletter serves as a platform to transmit critical service delivery achievements, broaden the knowledge base around the functions of the municipality, advance awareness and advocacy, share important updates and foster social cohesion in casting the spotlight on activities within our municipal boundaries.

Our historic imprints linked to the birth of civilization that has chiseled South Africa's development and our appreciation of a common vision for human progress and harmony, encourages us to uphold access to information, transparency and accountability. Each resident plays a vital role in shaping our future.

I urge you to actively engage with the content of this newsletter, participate in local initiatives, and share your ideas for making Kimberley, Platfontein, Ritchie and Riverton better places to live, work, and thrive.

Thank you for your continued support and dedication to our city and towns. Together, we can build a brighter tomorrow.

Towards a cleaner, growing city.

The Executive Mayor, Cllr Kagisho Sonyoni

THE MM's Monthly Write

The publishing of The Resident is an exciting chapter of our service commitment in sharing

municipal news and upholding access to information, openness and transparency which are legislative obligations. We pride ourselves for the reintroduction of this platform, considering that our last effort was amid the Covid-19 pandemic outbreak.

This publication is a service delivery testament. It exemplifies community consultations, perational planning and implementation. Equally important as reflected upon in some of the news articles, is the municipality's responsiveness in providing ratepayers and residents at large with an account of the efforts being undertaken by the administration in modernising utility services and customer-care.

Notably, the resident is given a voice. We will in our reportage, amplify the voices of those whom our services impact upon the most. We will provide an account of our engagements.

Regrettably, owing to financial constraints, the dissemination is restricted to electronic means until further notice. Please do enjoy this read!!

End of financial year highlight: Resealing and paving of roads

The Sol Plaatje Local Municipality (“SPLM”) has completed its roads resealing and paving as planned for the end of the 2023/2024 financial year.

The investment into the roads resealing and the gravel roads upgrading was over R45 million.

UPHOLDING QUALITY AND SAFER ROADS

“The municipality has received a total of R19, 5 million from the Infrastructure Urban Development Grant (IUDG) of National Treasury and a further R6 million from the Frances Baard District Municipality.

This brings the total to R25, 5 million budget allocation for rehabilitation of roadways.

“The Municipality’s Roads and Stormwater section has reached its target of resealing a total of 100 000m² (square meters) within the Sol Plaatje Municipality area. This involved a combination of the chip and spray, as well as the asphalt overlay method,”

explained the Executive Mayor Kagisho Sonyoni

Various roads with high traffic volumes around the Kimberley area were identified and completed.

“The roads that have been resealed thus far are as follows;

“Phakamile Mabija Street, Schmidtsdrift Road, Royal Street, Morgan Street, Hulana Street, Mac Dougall Street, Albertyn Street, Aristotle Street and Petrus Street,” he added.

PAVING GRAVEL ROADS FOR ENHANCED ACCESSIBILITY

“The Roads and Stormwater section’s internal construction team paved a total of 21 sites which included the upgrading of a number of streets in Kimberley and several pathways from gravel to paved standard with an allocation of R20 million from the Infrastructure Urban Development Grant (IUDG).”

A total number of 195 jobs were created through the Expanded Public Works Programme (EPWP).

“The scope of work entailed surveying; mass earthworks, kerb laying, laying of rock dust, laying of paving bricks, laying of sand and compaction, and site clearing,” the Alderman pointed out.

NEW ROAD MARKINGS IN UPHOLDING ROAD SAFETY

He added that the roads resealing brought in its wake a critical road safety dimension. “The Municipality’s Traffic Department had to apply new road markings in an effort to uphold road safety on the roads that have been resealed. Barrier lines and other markings - especially at intersections, traffic islands and pedestrian crossings were repainted. Work is ongoing in this respect.”

The Resident -

Eisie Springbok of Weaver Street, Ward 2 (Roodepan):

I would like to wholeheartedly thank Sol Plaatje Municipality and let this paving of the street be extended to other areas with a dire need. It is a privilege to be able to walk on a paved street considering the difficulties we endure during heavy rains.

The Resident -

Tony Pietersen of Haddock Street in Ward 3 (Homelite):

For a motorist like myself, driving around here has been difficult after the rains. This development is one of the best things to have happened and it has also created local jobs.

SERVICE DELIVERY IN FOCUS: ROADS AND STORMWATER

The Roads and Stormwater section unleashed its service delivery charge by undertaking maintenance through tar-patching (pothole fixing), repairing of sidewalks and cleaning of stormwater intakes from the month of August 2024.

The Roads and Stormwater section on a service delivery roll

Executive Mayor Kagisho Sonyoni launches service delivery fleet worth over R3 million

The promise of the wheels of service delivery turning faster this financial year, manifested itself as the Executive Mayor Cllr Kagisho Sonyoni unveiled a brand new fleet worth over R3 million in early July.

Flanked by Members of the Mayoral Committee (MMCs), Cllr Sonyoni emphasised the acceleration of service delivery through the acquisition of seven one-tonner bakkies; three Isuzu D-Max 4x4's for the Mechanical Engineering section and four GMW Steeds for the Waterworks section, all at a total cost of R2.6 million.

“We have purchased these workhorses to ensure that we embolden service delivery by being more responsive. On the part of the Waterworks section, it ought to avoid at all costs blaming the inability to reach the sites of burst pipes and leaking meters on the unavailability of the fleet.”

Driving service delivery - New fleet on display

The unit is also ceased with the responsibility of having to daily monitor a 30km bulk pipeline radius punctuated by rugged terrain.

“Equally, the Mechanical Engineering Unit provides all-round support from

construction, repair and maintenance of essential to non-essential municipal infrastructure and machinery amongst others. The bakkies are a service delivery pinnacle for the unit in accessing many sites,” asserted the Executive Mayor Cllr Kagisho Sonyoni in unveiling the vehicles.

The Municipal Manager. Thapelo Matlala indicated that an added investment is to be made in enhancing the municipalities fleet and that sharp focus would be put on yellow fleet for landfill waste management and residential waste collection.

The Speaker of the Municipality Cllr Nomazizi Maputle was also allocated with a new vehicle in spearheading her public participation tasks and overall office functions; VW Tiguan worth R617 156,55 - as prescribed by National Treasury norms and standards.

New fire fighting engine goes on maiden mission

Meanwhile, the new state-of-the-art firefighting truck worth R 9 million, went on its maiden mission this month. It has been heralded as a major acquisition in the Fire Department's fire extinguishing arsenal and disaster management responsiveness.

The Major Pumper is equipped with the latest technologies and build-in foam system that can be used for fuel spillages, amongst

many other topnotch features.

“Through this acquisition, it is crystal clear that we have put back the sparkle into community safety. A string of auxiliary equipment has had to be mounted in ensuring this fire-engine meets regulatory requirements and is fit-for-purpose. The industry's very best were relied upon in equipping it,” said Cllr Sonyoni enthusiastically at the occasion of the unveiling of the fire-engine in mid-June.

Sol Plaatje Municipality's Fire Chief Ntante Sephiri indicated that all fire fighters are to be trained on several aspects relating to handling of the truck.

TWO COMMUNITY HALLS SET FOR UPGRADE

Jewel being restored: Florianville Civic Hall

Appreciably, it is in the first-quarter of the financial year 2024-25, and the fencing of the Florianville Civic Hall shines in its completeness. This municipal facility together with Galeshewe's Social Centre are to be restored to their former glory through a R5 million upgrade.

At the Florianville Civic Hall, the ablution facilities and the roof are to be revamped. Added to the scope of work is the installation of air-conditioning, the reinforcing internal and external security features such as the burglar bars and alarm system, various disability accessibility features, and other improvements included. The repair work is set for completion by end of March 2025.

According to the Project Leader, Tumelo Maropong of Community Services, Galeshewe's Social Centre will undergo lesser interior and exterior renovations. She indicated that the hall is expected back in use before end of this year. The halls upgrades are being funded from the Integrated Urban Development Grant (IUDG).

The Resident: Viewpoint

Floors High School Teacher:
Collin Baartman

Reinstating Floors Civic Hall as the Epicentre of Community Life

This hall was the centre of our community. It served our communities, stretching from Roodepan. Communities of Homevale, Floors, Square Hill Park, Homestead, Colville and even Barkley Road, we all used this hall. It was either this one or the Sun-Orama, but then it was under private ownership.

At this hall (civic), we use to have school concerts and birthday parties. I still remember the beautiful facilities. It had a tuckshop, change rooms, fantastic ablutions, even a side-hall where you could entertain and serve people food. It was a go to place for activities that we had organised in our communities.

I grew up here, I was born in Kimberley and

I lived in Colville with my grandmother, until we moved to Homevale later, but we were always migrating back to the hall here. And, when we saw it falling into disrepair it was very disheartening because where could our people go? School halls don't always have the facilities and if in private ownership, people charge exorbitant fees. If it's with the municipality, you have a place that is accessible and offers all the facilities.

It is very exciting to see the initiative to have it repaired. Our school and the community will benefit from it. If it's taken care of, with proper security and its maintained, at least we'll have the assurance that it's one of the assets our grandchildren can use into the future.

We are adjacent to the hall, we'll have access to the hall. We'll have the privilege of conducting our School Governing Body elections and our prize-givings which are big occasions.

Championing The Cause

Ward 14 Councillor George Joseph

When I submitted my IDP in 2021, the Civic Centre and sport facilities were my priorities in and around the area. I have eight primary schools, two high schools, and several sports clubs within my ward that used the Civic Hall as it was the only hall that was available to the coloured communities that could be hired for functions and indoor sports. At this present day and age, there are no such facilities within the area for coloured communities and sports clubs to use.

Without school sport (no facilities or sport grounds) and a few functional sport clubs, our coloured youth are left wanting, leading to drugs and substance abuse. There's an old saying "a child in sport is a child out of court," and that can be seen if you go to court nowadays.

Another reason for the Civic Centre to be restored, is when we have elections, we must use the high school's classrooms as it has no hall to use for annual matric exams. So, my plea is to get our Civic Centre restored to its former state as it is desperately needed by our coloured communities.

Sol Strikes A Technological Advance With Electronic Meter-Reading Devices

In a significant move towards modernisation and in setting an accurate billing benchmark, the Sol Plaatje Local Municipality introduced the use of handheld electronic meter-reading devices.

“We are excited to introduce this innovative technology to our utility services. The transition to electronic meter-readings marks a significant step in our commitment to provide efficient, transparent, and reliable services to the residents.

“This initiative not only improves our operational efficiency but also enhances our engagement with the consumers in ensuring accurate and timely billing. The devices are equipped with picture-taking and

GPS capabilities which allow the meter-reader to capture meter-reading, upload and update the system,” explained Member of Mayoral Committee for Human Settlements Cllr Mncedisi Nolitye in addressing a media briefing held at the Sol Plaatje Housing Support Centre in Galeshewe.

The Managing Director of MeterMo, developers of the metered utilities software, Charl Beukes was also in attendance: “We geared up in providing support to the municipality. The transitioning from manual to electronic might present teething problems in the early stages but we have the early phase to conduct assessments.”

Bold digital pursuit - Sol Plaatje Municipality meter readers have started putting the handheld meter reading devices to use

Key Other Features of the New System:

- | | | | |
|---|--|--|---|
| <p>1. Accuracy and Efficiency:</p> <ul style="list-style-type: none"> • The handheld devices ensure accurate and timely meter readings, reducing errors associated with manual processes. • The devices capture high-resolution images of the meter, | <p>2. GPS Integration:</p> <ul style="list-style-type: none"> • GPS functionality allows precise location tracking of each meter reading, ensuring that readings are taken at the correct locations and improving overall accountability | <p>3. Enhanced Transparency:</p> <ul style="list-style-type: none"> • The new system promotes transparency by providing clear evidence of meter readings through photos and GPS coordinates, which can be shared with consumers upon request and in the near future visible on the statement. • This transparency helps to build trust between the municipality and its consumers | <p>4. Improved Service Delivery:</p> <ul style="list-style-type: none"> • Faster and more accurate meter readings lead to timely billing and improved service delivery. • The new system reduces the need for re-reads and adjustments, streamlining the |
|---|--|--|---|

Our Implementation Plan:

The rollout of the electronic meter reading system includes:

- Training and Deployment: Municipal staff have received comprehensive training on the use of the new handheld devices, ensuring a smooth transition.
- Resident Communication: Residents will be informed about the new system through community meetings, local media, and official municipal communication channels.
- The next phase will allow consumers to electronically submit their meter-readings by uploading captured images into the billing portal www.solplaatje.online and later through the use of a smartphone application which entails the elimination of yellow slip meter-reading paper

FENCING A LEGACY AND UNEARTHING FUTURE STARS

Building the foundation for future champions: Workers at Frank Foro Cricket Pitch

Vision set: Ward 9 Councillor Diteko Dioka

The fencing of the Frank Roro Cricket Club pitch in ward 9 is at an advanced stage. The municipality has allocated in grant funding R2,2 million for its fencing, replanting of the lawn and changeroom refurbishment.

Ward Councillor Diteko Dioka welcomed the fencing of the pitch: “As a ward we submitted five priorities for the ward based Integrated Development Plan (IDP) 2022-2027

and the ward 9 Sport Precinct inclusive of the Frank Roro Cricket Pitch revamp was one of them.”

“We are proud of this realisation of the project. The aim is to relocate the nearby shacks to 'Frans Farm,' seek sponsors to build a community swimming pool, netball, volleyball and five-a-side soccer courts around the cricket pitch. Added to the precinct would be the fencing of the Madrid

soccer field and the laying of an astro turf. Thus, turning our ward into a sport, recreation, events management and wellness go to ward.”

He added that the benefits are many, “youth development, thriving SMMEs and emboldening the community wellbeing” which are part of a legacy project he hopes to achieve for the residents.

THE RESIDENT – SPOKEN WORDS

Thami Lavern
Coach – Frank Roro Cricket Club

Upon completion, more kids will be drawn towards the sport. The schools that are nearby will also be able to use this facility. Mini-Cricket with its long-standing record of unearthing young cricketers will once again find its developmental relevance. Equally of importance, we are looking forward to hosting home games.

We urge parents to get involve in the neighbourhood watch in defence of this facility. Anonymous tip-offs, and reporting to relevant authorities, are important

Tumisho Lekaute
17-year-old player – Frank Roro Cricket Club

I have been playing here for almost nine years. It is an incredibly good opportunity that we are been given, and we are grateful. I would also like to emphasise on us being able to play our home games, invite other teams and be part of the cricket community.

Mosa Mochawane
17-year-old player – Frank Roro Cricket Club

I am glad to see the fencing project happening, which means we are getting a step closer to playing home games. It has always been a struggle for our coaches to arrange home games for us. The better the pitch gets, the more opportunities will get and the statistics would show.

Municipality Partners With Easypay For Digital Bill Payments

The month of September marked the fourth month of the municipality's online bill payment with Easypay, a leading provider of digital payment solutions.

This service aims to simplify the way our residents and businesses receive and pay their municipal bills. Through the Easypay system, all account holders can now receive

their municipal accounts digitally via email and SMS, and make payments conveniently through an online portal.

Municipal Manager Thapelo Matlala welcomed the digital payment headway

“We are thrilled to launch this new digital payment system in collaboration with

Easypay. This initiative is a testament to our ongoing efforts to modernise municipal services and make everyday tasks more convenient for our residents, especially the ratepayer.

“We believe that this system will not only improve payment efficiency but also customer satisfaction.”

Residents can now pay their municipal bills online through the Easypay platform, www.solplaatje.online. This new service allows for a range of cashless payment options, including debit and credit cards, EFT, and mobile payments, ensuring residents can settle their accounts quickly and securely from the comfort of their homes or workplaces.

Improving efficiency and reducing queues

The introduction of digital bill payments is expected to significantly reduce the long queues traditionally associated with municipal payment offices. By offering a fast, reliable, and user-friendly payment method, the municipality aims to improve overall efficiency and provide a cashless and convenient experience.

User-friendly and secure platform

Easypay is known for its robust security measures and user-friendly interface, ensuring that all transactions are protected and residents can navigate the platform with ease. The system is designed to handle high volumes of transactions, ensuring that the payment process remains smooth and uninterrupted.

- Convenient Bill Presentation: No more waiting for paper bills. Receive your accounts digitally, ensuring timely and efficient access.
- Easy Payment Options: Make payments directly online through the Easypay portal, which is secure and accessible 24/7.
- Environmentally Friendly: Reduce paper usage and contribute to a greener planet by opting for digital bills.

The easiest way to pay your bills online.

Register and make your payments today to win incredible prizes using EasyPay!
